

REQUIREMENT	WINDOWS NETWORK	UNIX/LINUX	VAX
CPU	Pentium 4 (or equivalent), 2GHz+	Depends on Operating System	Depends on Operating System
Disk Space (server only) (estimate 20K per debtor file to get approximate space requirements for debtor files.)	15MB for programs, additional requirements for data depends on case load. 500GB recommended	15MB for programs, additional requirements for data depends on case load.	15MB for programs, additional requirements for data depends on caseload.
Server	Intel Xeon (or equiv) 2 GHz+ multi-core CPU recommended	Must be certified compatible by the Operating System manufacturer.	VAX Alpha
Memory (workstation)	Minimum 1GB, if running WindowsXP, minimum 2GB if running WindowsVista or Windows 7	N/A	N/A
Memory (server) (be sure to check with your network consultant to be certain network minimums are met.)	2 GB or greater	64MB for Operating System plus 1MB per concurrent session of Collection partner.	Please contact your hardware consultant.
Operating System (workstation)	Windows XP or later is recommended. Acucobol Windows Runtime version 5.2 available from Hubbard Systems.	N/A	N/A
Operating System (server)	Windows Server 2003/2008	SCO Unix Release 5 (preferably a higher version--however, version 5 is still supported) or other compatible UNIX or Linux Operating System.	VMS Version 5.0 or higher.
Modem	The use of dial-up modems is strongly discouraged. We recommend a high speed internet connection.	28,800 baud or faster external modem supporting hardware (RTS/CTS) flow control. Internal modems are not compatible with UNIX. We strongly recommend MultiTech or U.S. Robotics modems for UNIX servers.	28,000 baud or faster external modem supporting hardware (RTS/CTS) flow control. Internal modems are not compatible with VMS.
Monitor / Terminal	Color VGA	True ANSI (or SCO Console) emulation. Must support at least ten function keys & dual intensity.	VT-200 series or higher (or 100% compatible) Must support a least 20 function keys & dual intensity.
Backup System	High-quality tape, backup to disk, or online backup is strongly recommended.	QIC, DAT or 8mm - must have native Operating System support.	TK-50, DAT or 8mm - must have native Operating System support.
Printers	HP LaserJet, DEC, or Epson/IBM compatible. The printer must accept data from a captured LPT port or network print queue. NOTE: Printer must be PCL compliant. Some lower end laser printers such as HewlettPackard Laser Jets 1010 and 1012 are not PCL compliant and will not work with Collection Partner.	HP LaserJet, DEC or Epson/IBM compatible. NOTE: Printer must be PCL compliant. Some lower end laser printers such as HewlettPackard Laser Jets 1010 and 1012 are not PCL compliant and will not work with Collection Partner.	HP LaserJet, DEC or Epson/IBM compatible. NOTE: Printer must be PCL compliant. Some lower end laser printers such as HewlettPackard Laser Jets 1010 and 1012 are not PCL compliant and will not work with Collection Partner.
Recommended System Protection	UPS on server, surge suppressor on workstations.	UPS on server, surge suppressor on workstations.	UPS on server, surge suppressor on workstations.
Communication Software	Must have broadband (high speed) internet access in order for Hubbard Systems to connect to your system, per your request and authorization, for support and maintenance.	Dial-in terminal emulation and uucp file transfer services must be provided. The connection must be configured properly using hardware flow control for the modem and software flow control for the line. A phone line with a direct outside number must be available.	Please discuss with Hubbard Systems Sales and Support department.
Word Processing Software	Collection Partner supports the current versions of Microsoft Word and WordPerfect.	WordPerfect version 5.0 or higher.	WordPerfect version 5,0 or higher.
